CASH RECEIPTS FROM FARMING IN OHIO, 1977

Ohio cash receipts from farm marketings of crops, livestock, and livestock products was \$2,793,615,000 in 1977, up 2 percent from a year earlier and the highest of record since estimates were first prepared in 1924. At \$1,636,905,000, the 1977 sale of crops increased 4 percent from 1976 and accounted for 58.6 percent of the total cash receipts from farm marketings compared with 57.7 percent in 1976. Cash receipts from livestock and livestock products at \$1,156,710,000 were down slightly from a year earlier and accounted for 41.4 percent of the total compared to 42.3 percent in 1976. Government payments amounted to an additional \$33,102,000.

Ohio's total 1977 realized gross farm income was \$3,362.4 million, of which \$568.8 million was from services other than farm marketings. About 81 percent of the total was needed for production expenses, leaving a figure of \$640.0 million as realized net income. The percent of income going for expenses was slightly less than in 1976 but considerably higher than the 72 percent needed in 1973.

Soybean cash receipts at \$621,926,000 for 1977 ranked number one and established a new record high as the largest single source of Ohio farm income. Soybeans ranked first in 1974 with the previous all-time high of \$590,692,000 but dropped to second place in 1975, before returning to first place in 1976. Corn with 1977 cash receipts of \$539,536,000 remained in second place for the second consecutive year. Wheat maintained the sixth place ranking although declining 22 percent from 1976, chiefly because of lower prices. Greenhouse and nursery crops passed the \$100 million mark, replacing vegetables which showed a 4 percent decline.

In the major livestock groups, cash receipts from dairy products of \$437,461,000 increased slightly from 1976 and this commodity retained its ranking as the third most important item.

Cattle and calves at \$321,797,000 and hogs at \$253,543,000 remained in fourth and fifth positions. Inventory sell-offs helped increase cattle cash receipts 8 percent over 1976. Hog producers hesitated to start a new production cycle, thus lowering cash receipts for 1977 by 7 percent. Poultry and eggs had cash receipts of \$115,851,000 -- an 8 percent decline in revenue -- but remained in seventh position.

In 1977 Darke County again led the State in total cash receipts with \$93 million compared to \$97 million in 1976. The next four highest counties were Mercer, Wayne, Putnam, and Fulton. Each exceeded \$65 million in cash revenue.

Leading counties by commodities were: soybeans, Wood; corn, Pickaway; dairy products, Wayne; hogs, Clinton; cattle and calves, Clark; wheat, Hancock; poultry and eggs, Darke; greenhouse and nursery, Lake; and vegetables, Huron.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1945-1977

Year	Farm Marketings			Government Payments	Total Cash Receipts and Government Payments	Percent of All Commodities	
	Livestock and Livestock Products	Crops	Total Livestock and Crops			Livestock and Livestock Products	Crops

Misc. crops 8/	798	*	894	*

1/Commodity groups may not balance due to exclusion of minor crop cash receipts. As published in the "State Farm Income Statistics, Supplement to Statistical Bulletin No. 609, July 1978." 2/Percents may not be accurate to one-tenth percent because of method of machine computation. 3/Turkey eggs, ducks, and other poultry combined with other livestock to avoid disclosure of individual operations. 4/Includes horses, goats, mink pelts, all other livestock, ducks, turkey eggs and other poultry. 5/Fresh only. Processing included with other vegetables. 6/Includes sweet potatoes, lima beans, snap beans for processing, beets, cauliflower, eggplant, watermelon, carrots, spinach, cantaloup, green peas, and miscellaneous vegetables. 7/Includes cherries, pears, plums, blueberries, raspberries, other berries, miscellaneous fruits and nuts. 8/Includes alfalfa seed, sweet clover seed, other seeds, sunflower seed, sorghum grain and spelt. *Less than 0.05 percent.

Procedure

Ohio estimates of cash receipts by county from farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Economics, Statistics, and Cooperatives Service of the U. S. Department of Agriculture. This bulletin contains 1977 Ohio county cash receipts estimates and revised 1976 state estimates. County production estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin.

Current cash receipts estimates for Ohio and other States appear in the USDA's State Farm Income Statistics Supplement, 1978. These estimates are prepared by the Economics, Statistics, and Cooperatives Service of the U. S. Department of Agriculture from basic data obtained by that agency, the Census of Agriculture, and other sources. Estimates presented in this publication may differ from previously published data due to revisions in marketings, in-shipments, inventory numbers, and other data, as more complete information becomes available. Cash receipts for some commodities were combined to avoid disclosure of individual operations.

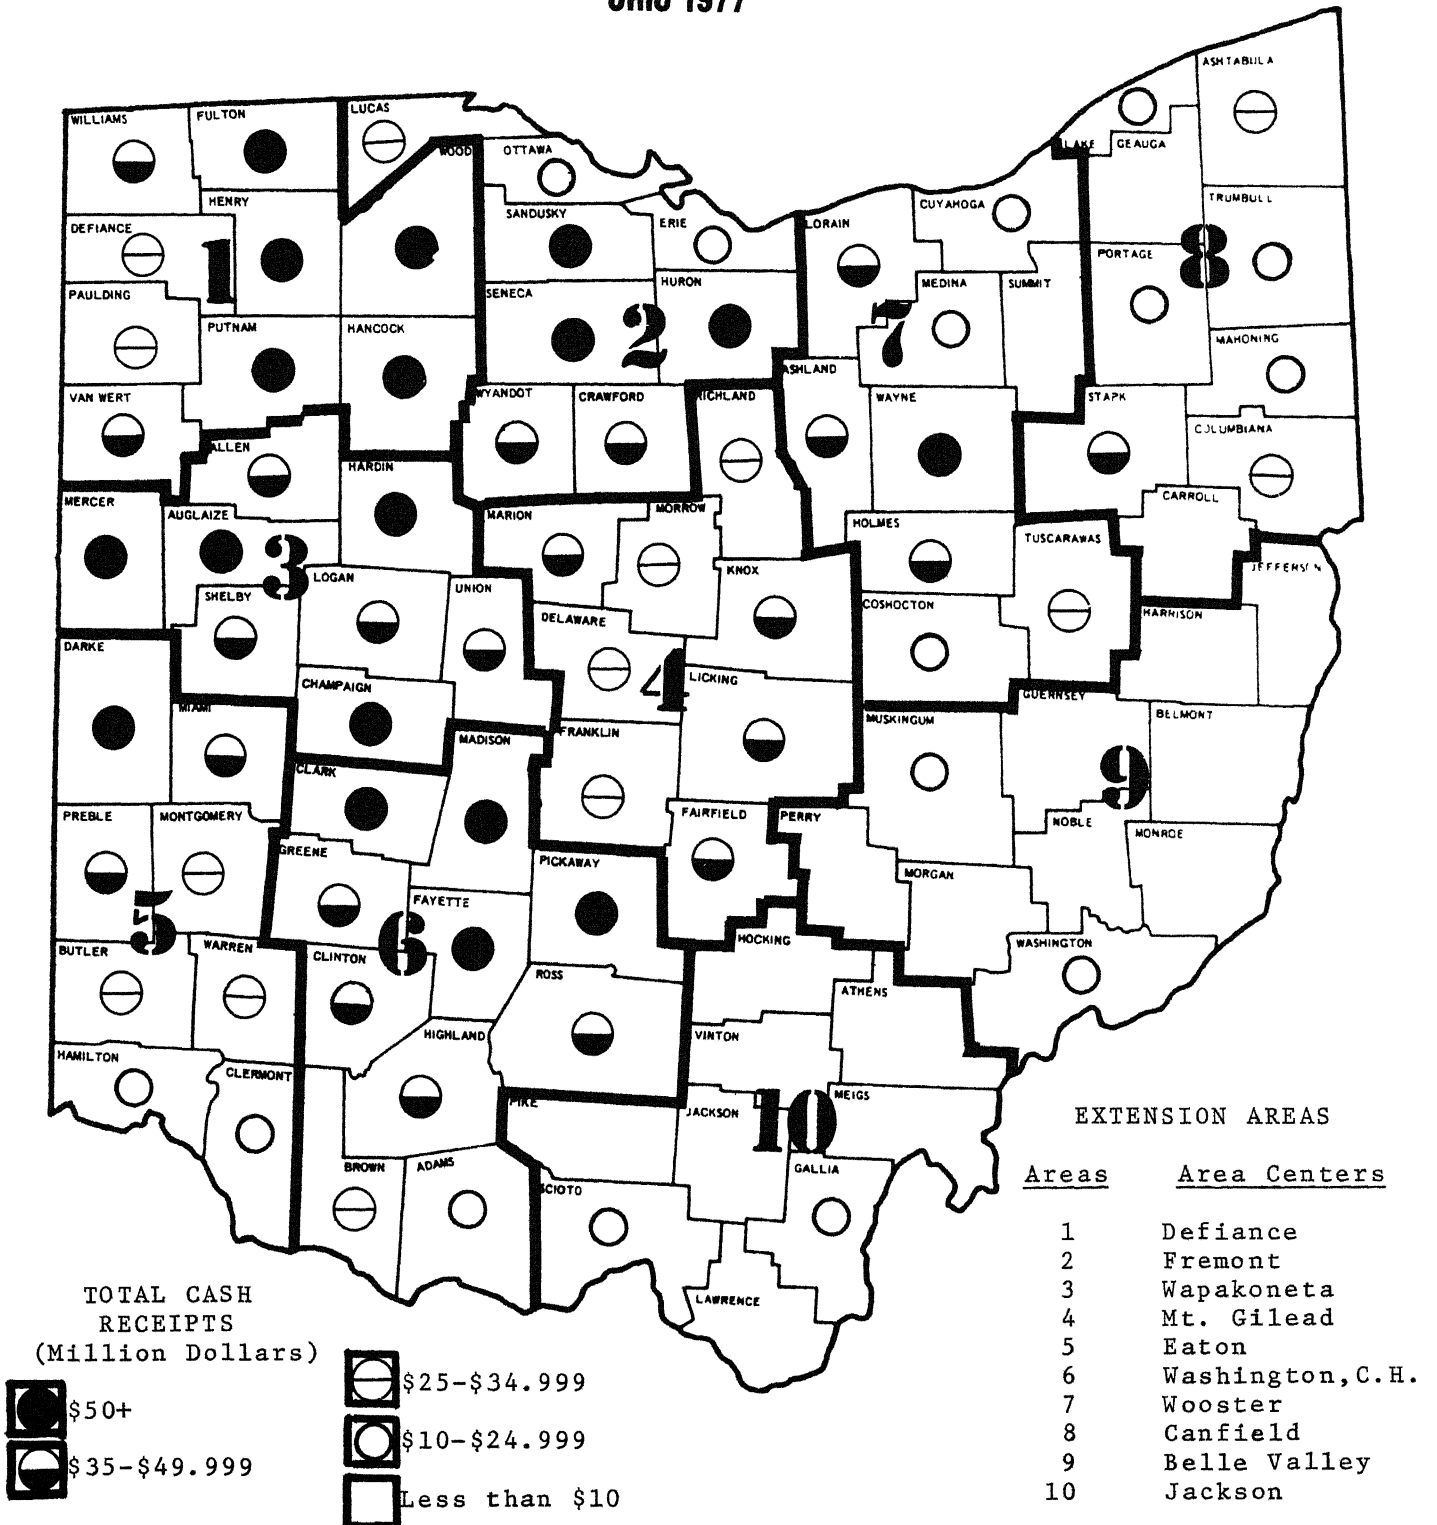

Cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from marketings are derived by allocating state estimates to counties on the basis of crop reporting and census marketings by crop reporting districts. Check data such as county dairy production from the milk market administrators are also used.

A farm is a place of less than 10 acres if the sales of agricultural products for the year amounted to at least \$250 or normally would be expected to amount to that value or more. Places of 10 acres or more were counted as farms if the sales of agricultural products amounted to at least \$50 or normally would be expected to amount to that value or more. The average cash receipts per farm will aid in the comparison of counties with similar farming practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people. Included are personnel of agricultural agencies throughout Ohio. The greatest recognition is due the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
